## Continuity in Computing

# Virtual Alpha Developments

14-NOV-2011

Winter has been toying with us, but that hasn't slowed down developments at Migration Specialties. We have several important announcements in this update.

## Avanti 2.1

We are pleased to announce the release of Avanti 2.1. The major news in this release is the ability to run multiple instances of Avanti on a single host system. Multi-instance support requires sufficient host resources (CPUs, memory, disk) and adequate Avanti license units. If adequate host resources are available, one instance of FreeAXP can always be run simultaneously with one or more Avanti instances.

## Charon Trade In

We have launched our Charon Trade In Program. Trade in your Charon-AXP dongle for an Avanti dongle and save on support costs! Simply purchase an [Avanti Annual Support Contact](#) and we will send you an Avanti license dongle. Return your Charon-AXP dongle within 30 days and you are done. You will be saving on support fees without impacting your virtual Alpha operations.

*Bonus Offer!* Send us your Charon-AXP configuration file and we will send you the equivalent Avanti configuration at no charge.

## Online Purchasing

We have added online purchase options to our web site. Now you can add select Migration Specialties products such as [Avanti](#) to a shopping cart and pay for them online via credit card or PayPal.

## Web Site

Our web site has gone through a major upgrade. If we have done our homework, this upgrade will be invisible to the end user. We have moved from XHTML 1.0 to HTML 5 compliance. Your feedback on our site is welcome.

Over the next few months, here is what we have on our agenda:

- **Avanti:** Addition of virtual tape support.
- **Mayfair:** Our first commercial virtual VAX release.

Visit our [Virtual Alpha page](#) for additional information on Avanti, AvantiFlex, and FreeAXP virtual Alpha solutions.

FreeAXP downloads stand at 6,100+. Thank you for your support.
